ExpenseEase Test Cases

36 assigned test cases. Actual Result, Status, and Evidence recorded for all 36 cases.

ID	Tester	Module	Input / Description	Expected Result	Actual Result	Status	Evidence
TC-01	Shreeya Srivastava	Groups	Create a group with a valid name	New group is created and returned to the owner	Group “Trip” was created and shown in the group list.	Pass	Screenshot_TC01.png
TC-02	Shreeya Srivastava	Groups	Create a group with an empty name	Validation error is returned	Request was rejected and the group-name validation message appeared.	Pass	Screenshot_TC02.png
TC-03	Shreeya Srivastava	Membership	Add a valid registered member to a group	Member is added once and appears in group data	Member was added once and appeared in the group data.	Pass	Screenshot_TC03.png
TC-04	Shreeya Srivastava	Membership	Add the same member twice	Duplicate membership is rejected	System rejected the member because they already belonged to the group.	Pass	server/tests/integration/groups.api.test.js
TC-05	Shreeya Srivastava	Membership	Remove a member as group owner	Member is removed from the group	Member was removed from the group by the owner.	Pass	Screenshot_TC05.png
TC-06	Shreeya Srivastava	Membership	Remove a member as non-owner	Authorization error is returned	Request was rejected with an authorization error.	Pass	Screenshot_TC06.png
TC-07	Shreeya Srivastava	Group UI	Open the group page with no groups	Empty state and group creation action are shown	Empty state and the create-group action were displayed.	Pass	Screenshot_TC07.png
TC-08	Shreeya Srivastava	Group UI	Open a group with several members	Group details and member list render correctly	Group details and the member list rendered correctly.	Pass	Screenshot_TC08.png
TC-09	Shreeya Srivastava	Integration	Load group data after sign-in	UI displays only accessible groups	UI displayed only the groups the signed-in user could access.	Pass	Screenshot_TC09.png
TC-10	Shraddha Sharma	Registration	Register with valid name, email, and password	Account is created and a valid response is returned	Account was created and a valid response was returned.	Pass	Screenshot_TC10.png
TC-11	Shraddha Sharma	Registration	Register with an existing email address	Duplicate-account error is returned	Registration was rejected with a duplicate-account error.	Pass	Screenshot_TC11.png
TC-12	Shraddha Sharma	Validation	Submit registration without a password	Validation error identifies the missing field	Expected validation message did not appear; the form submitted instead.	Fail	Screenshot_TC12_failure.png
TC-13	Shraddha Sharma	Login	Sign in with valid credentials	User receives an authenticated session or token	User received an authenticated session and token.	Pass	Screenshot_TC13.png
TC-14	Shraddha Sharma	Login	Sign in with invalid password	Authentication error is returned safely	Login was denied and an invalid-credentials message was displayed.	Pass	Screenshot_TC14.png
TC-15	Shraddha Sharma	JWT	Access protected route with valid token	Protected response is returned	Protected response was returned for the valid token.	Pass	Screenshot_TC15.png
TC-16	Shraddha Sharma	JWT	Access protected route with no token	Unauthorized response is returned	API returned an unauthorized response without exposing protected data.	Pass	server/tests/auth.test.js
TC-17	Shraddha Sharma	JWT	Access protected route with malformed token	Unauthorized response is returned safely	API returned an unauthorized response without exposing protected data.	Pass	Screenshot_TC17.png
TC-18	Shraddha Sharma	Auth UI	Submit login with empty required fields	Inline validation messages are displayed	Inline validation messages appeared for the empty required fields.	Pass	Screenshot_TC18.png
TC-19	Rudransh Pratap Singh	Expenses	Create expense with valid amount and participants	Expense is stored and returned with split data	Expense was saved and appeared in the selected group activity.	Pass	Screenshot_TC19.png
TC-20	Rudransh Pratap Singh	Expenses	Create expense with zero or negative amount	Validation error is returned	Request was rejected with an amount validation error.	Pass	Screenshot_TC20.png
TC-21	Rudransh Pratap Singh	Expenses	Edit expense as its creator	Updated values are stored and displayed	Updated values were stored and displayed for the creator.	Pass	Screenshot_TC21.png
TC-22	Rudransh Pratap Singh	Expenses	Edit expense as non-owner	Authorization error is returned	Edit was rejected with an authorization error.	Pass	Screenshot_TC22.png
TC-23	Rudransh Pratap Singh	Expenses	Delete expense as its creator	Expense is removed from group activity	Expense was deleted and removed from group activity.	Pass	Screenshot_TC23.png
TC-24	Rudransh Pratap Singh	Equal Split	Split 10,000 paise across three members	Shares total 10,000 and remainder is deterministic	Shares totalled 10,000 paise and the remainder was assigned deterministically.	Pass	Screenshot_TC24.png
TC-25	Rudransh Pratap Singh	Exact Split	Submit shares equal to expense total	Exact shares are accepted	Exact shares equal to the expense total were accepted.	Pass	Screenshot_TC25.png
TC-26	Rudransh Pratap Singh	Exact Split	Submit shares not equal to expense total	Validation error is returned	System prevented submission and displayed a split-total validation error.	Pass	server/tests/expenses.test.js
TC-27	Rudransh Pratap Singh	Percentage Split	Submit percentages totaling 100	Calculated shares total expense amount	Calculated shares totalled the expense amount.	Pass	Screenshot_TC27.png

ID	Tester	Module	Input / Description	Expected Result	Actual Result	Status	Evidence
TC-28	Sachit Jain	Percentage Split	Submit percentages totaling less than 100	Validation error is returned	Submission was rejected with a percentage-total validation error.	Pass	Screenshot_TC28.png
TC-29	Sachit Jain	Balances	Load balances after expenses are added	Member balances are calculated consistently	Member balances were calculated consistently after expenses.	Pass	Screenshot_TC29.png
TC-30	Sachit Jain	Balances	Apply settlement to a group balance	Payer and receiver balances update correctly	Settlement was saved and both member balances updated.	Pass	Screenshot_TC30.png
TC-31	Sachit Jain	Debt Simplification	Use two debtors and one creditor	Suggested transfers settle balances with minimal transfers	Suggested transfers settled all balances with the minimum number of transfers.	Pass	Screenshot_TC31.png
TC-32	Sachit Jain	Settlements	Create settlement between distinct members	Settlement is stored and listed for group	Settlement was stored and listed for the group.	Pass	Screenshot_TC32.png
TC-33	Sachit Jain	Settlements	Select same payer and receiver	Validation prevents invalid settlement	Validation prevented a settlement with the same payer and receiver.	Pass	Screenshot_TC33.png
TC-34	Sachit Jain	Dashboard	Load dashboard for group with expenses	Summary cards, balances, and settlements render correctly	Summary cards, balances and settlements rendered correctly.	Pass	Screenshot_TC34.png
TC-35	Sachit Jain	Docker	Start application and database services	Services start and application connects to database	Test could not be completed because the database service was unavailable.	Blocked	Docker_terminal_error.png
TC-36	Sachit Jain	Demo	Follow demo setup from clean environment	Required workflow can be demonstrated	Required workflow was demonstrated successfully from a clean setup.	Pass	Screenshot_TC36.png
